-

A Web Developer, currently developing on the front end to build and maintain web applications. I also have a keen interest in back end development and creating applications as a full stack developer.

I mostly use React/Node.js when creating personal projects and have also used C#/.NET Core. With these projects I have also connected to multiple databases including Firestore, MongoDB and SQLite.

I am a Permanent Resident of Canada and I have the legal right to work in Canada without the need of sponsorship.

EXPERIENCE

Front End Developer | Public Consulting Group UK

APR 2021 - PRESENT, WIGAN, UK (Remote)

- Building and maintaining web applications using HTML, CSS & Javascript/jQuery.
- Connect to API's and create/implement new site features.
- Follow version control practices using Azure & Bitbucket, this includes multiple dev environments, branches and PR approval.
- Liaise with designers, project managers and QA to advance site UI/performance.
- Optimize web design for mobile and other platforms.
- Agile workflow working in sprints to complete assigned tasks.

Customer Success Supervisor | Nutrition Hacks

NOV 2018 - 2020, TORONTO, CA

- Provided customer service via Zendesk, Konnektive (CRM), Shopify, phone and social media.
- Trained new starters of the CS team.

Web/Design Assistant | AgriBriefing

MAR 2016 - 2018, PRESTON, UK

- Created, maintained and updated all of the websites within the company spectrum using CMS based platforms such as Wordpress.
- Produced design work from social media posts and logo design to digital advertisements.

Graphic Designer | CQ2 Limited

SEP 2013 - 2015, MANCHESTER, UK

- Worked on live briefs, this included designing creative pieces from scratch as well as corporate ad hoc design.
- Design work was created using the Adobe suite and was a mixture of print and digital.

EDUCATION

BrainStation | Diploma, Web Development
